

ANNEX 07B

Waste policy

The company's main office is equipped with specific areas and bins for recycling collection inside. The waste is then collected by the cleaning company and sorted into the condominium bins in the building's forecourt.

To encourage waste sorting and disposal, according to current regulations, all bins, inside and outside, are clearly marked, allowing staff members to dispose of the waste and collection workers to easily and conveniently pick it up for disposal.

The local company in charge of waste disposal is AAMPS - Azienda Ambientale di Pubblico Servizio SpA. This company provides all the services related to the management of the integrated waste cycle, including on-site recycled waste pickup, and street cleaning for the Municipality of Livorno, where the TFL offices are located.
