

ANNEX 08

Sustainable purchasing policy

In order to reduce its environmental impact, TFL Tours is committed to:

- intensive recycling of office supplies;
- electronic distribution of most files,
- consolidation of printers;
- purchasing products with an eco-label (such as printer paper);
- sustainable purchases such as centralized printers, water dispensers instead of bottles, and beverages and food from businesses that use only 100% biodegradable packaging, fair trade products and organic raw materials of excellent quality and local production, reinforcing the thinking of eco-sustainability;
- reduce waste and the amount of garbage through the widespread practice of bringing packed lunches with utensils, dishes and water bottles brought from home or alternatively buy lunch from businesses that use compostable packaging made of PLA corn starch and cellulose, fully compostable.
